Organization Development

Fhil Connects Computer Centre Website on wordpress
(https://philbi.best)
Designed and deployed the official website for Fhil Connects Computer Centre using WordPress Integrated course listings, contact forms, and SEO optimization to support student engagement and visibility.

Product Development
NovaxFolio – Full-Stack Portfolio CMS
Live: https://novaxfolio.vercel.app/

I developed a complete portfolio content management system using Next.js and Node.js together with PostgreSQL database technology.

I constructed a personalized database-based file storage solution to handle project assets which included PDF documents and ZIP files and XLSX spreadsheets.

The secure admin dashboard was created with complete CRUD capabilities for user access.

Implemented a responsive user interface which included animations and theme switching capabilities through the combined use of Tailwind and Framer Motion.

The system achieved performance optimization and search engine optimization through server-side rendering implementation.

Product Development
Fhinovax Smart Queue Manager (SmartQM)
Live: https://fhinovaxsmartqm.vercel.app/

I developed a digital queue management system which employs AI technology and uses Next.js and PostgreSQL and Prisma as its core technologies.

The system enables real-time queue monitoring through its digital ticketing system which eliminates the need for physical waiting lines.

SMS notification system was integrated into the system to provide users with alerts about their upcoming service time.

Developed AI assistant (RAG-based) system which handles user questions while decreasing the need for staff assistance.

The admin dashboard was designed with RBAC access control to enable

administrators to manage queue operations and service delivery.
